User Story – Get Customer's Vehicle Information

As a Subscription Services Platform user
I want to retrieve a customer's vehicle information
So that I can see information about the vehicle that belongs to the customer based on their id

Acceptance Criteria:
- Return only the vehicle information with the contract of:
    - `vin: string`
      `year: int`
      `model: string`

Notes:
- A customer will have only 1 vehicle associated with their id
- Customer ids range from 1 to 5
- Customer vehicle information can be retrieved from:
    - http://localhost:9091/customer/all

GET	/customer/all getAllCustomerVehicles

Parameters   [Try it out]

No parameters

Responses   Response content type `*/*` ⌄

Code	Description
200	**OK**

Example Value | Model

```
{
  "error": {
    "code": "string",
    "message": "string"
  },
  "lastRequested": "2022-03-17T15:36:23.701Z",
  "requestStatus": "string",
  "value": [
    {
      "customer": {
        "id": 0
      },
      "vehicle": {
        "model": "string",
        "vehicleIdentificationNumber": "string",
        "year": 0
      }
    }
  ]
}
```
